

OziExplorer

**Practical Training Course
by Chris Rule**

INTRODUCTION

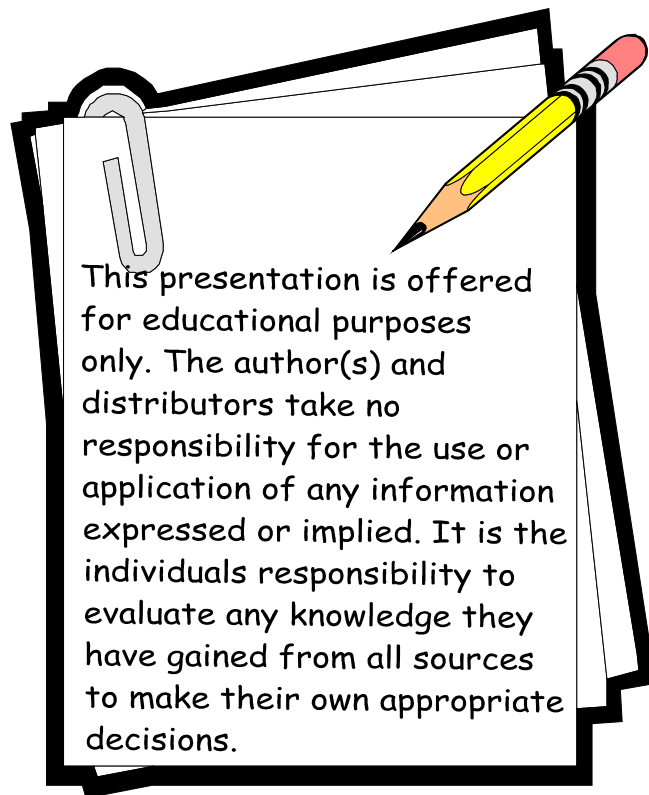

The purpose of this manual is to serve as a teaching guide for students who want to learn Oziexplorer.

This is not a complete guide to OZI. The student is expected to take the fundamentals acquired and to go on, on their own to learn the program more in depth.

OZI is being continually upgraded so any manual produced is quickly out dated.

There seems to be no end to what OZI can do, moving map on Palm Pilots, OZI 3D, OZI used for Automatic Radio Position Systems, OZI linked with digital cameras, and the list grows day by day.

This Training Manual is broken into modules that may be downloaded or printed as required.

Modules

1. Down Loading Ozi from a disk
Configuring Ozi
Working with Ozi tool bar
2. Load & Calibrate Map Images
3. Working With Waypoints
4. Working With Routes
5. Working With Tracks
6. Working with Maps Direct from a CD
7. Printing Maps

* Mistakes and omissions do occur, please contact the author to report them as well as any suggestions for this or any other course.
